Summary

Computer Science Engineering graduate with full-stack development experience across Java/Spring Boot and .NET. Delivered production support and AI-assisted engineering tooling for an enterprise payroll platform serving Asia-Pacific customers. Strong foundation in Data Structures & Algorithms, REST API design, relational database modelling, and Agile SDLC practices.

Skills

Languages: Java, C#, Python, JavaScript

Frameworks & Technologies: Spring Boot, Spring Security, Hibernate/JPA, REST APIs, React.js, Node.js, Express.js, .NET, ASP.NET

Databases: MySQL, SQL Server, MongoDB

Cloud & Tools: AWS, Git/GitHub, Jira, Confluence, Power BI, Katalon

Core CS: Data Structures & Algorithms, OOP, DBMS, Agile SDLC

Experience

Dayforce | Software Developer Intern

February 2026 – July 2026

Tech: .NET, Classic ASP, SQL Server, FoxPro, Git, Jira, Confluence

Bangalore, India

- Developed and supported enterprise payroll software serving Asia-Pacific customers across development, QA, and UAT environments.
- Investigated and resolved **9+** production defects on a large-scale payroll platform, performing root-cause analysis across legacy and modern stacks including **.NET, Classic ASP, FoxPro, and SQL Server**.
- Built a **PeoplePay Onboarding AI Agent** that converted internal engineering knowledge into guided self-service troubleshooting and documentation discovery, reducing repetitive support escalations.
- Developed an AI-assisted security remediation agent integrating **Atlassian and GitHub MCP servers** to retrieve engineering context and generate **CWE-mapped** remediation guidance for identified vulnerabilities.
- Collaborated with distributed engineering teams across Asia-Pacific within an **Agile SDLC**, contributing to sprint planning, development, code reviews, QA/UAT verification, regression testing, and release cycles.

Bloom Agency | Web Developer Intern

July 2024 – September 2024

Tech: HTML, CSS, JavaScript, WordPress

Remote

- Built and maintained responsive WordPress client websites using HTML, CSS, JavaScript, and PHP-based themes.
- Implemented on-page SEO and performance optimizations that improved organic search visibility and page load times.
- Worked directly with clients to gather requirements and translate them into functional web experiences, coordinating deliverables against project deadlines.

Projects

ClinicForge | Spring Boot, Java 17, React, MySQL, JWT

2026

- Built a full-stack clinic management platform covering appointment scheduling, prescriptions, medical records, and real-time notifications.
- Designed a normalized relational schema of **12** interconnected entities supporting multiple concurrent clinical workflows.
- Implemented **JWT-based authentication** with Spring Security, BCrypt password hashing, and role-based authorization across three user roles.
- Developed and tested **68+** **RESTful** API endpoints in Spring Boot and integrated them with a React frontend.

Full-Stack Trading Web App | React, Node.js, Express.js, MongoDB, AWS

2025

- Built a full-stack trading platform with secure user authentication and role-based access control.
- Implemented **CRUD** workflows for trade execution and portfolio management backed by MongoDB.
- Integrated third-party market data **APIs** to deliver real-time price and portfolio updates.
- Deployed and configured the application on **AWS** for cloud-based execution.

Certifications

- **Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate** — valid through 2027.
- **Data Structures & Algorithms** — Apna College. Java-based DSA training with extensive problem-solving practice.

Education

Siksha 'O' Anusandhan University (ITER)

Aug 2022 – July 2026

Bachelor of Technology (B.Tech), Computer Science Engineering

CGPA: 9.04
